SHORING SERVICES

# ALUMINUM SHORING

Big Eagle rents light-weight aluminum shoring in 3' to 12' lengths, with a minimum height of 2'. Our shoring systems are used to ensure safe access to buried infrastructure by securing or "shoring" the walls of an excavated site.

Tongue - in - groove panels are easily aligned. The panels can be easily transported in the back of a pick-up and can be easily assembled on site. For maximum versatility, the shoring system can be built in a 2, 3, or 4 sided configuration. All shoring is certified by a professional engineer to meet OH&S safety standards.

Aluminum Shoring also provides solutions for unique situations like municipal maintenance and repair, pipeline repairs and inspections, cable maintenance and installations, pipeline applications, transformer replacement and installations, fire hydrant systems installations and repairs and utility/water repairs and maintenance.

## BENEFITS OF BIG EAGLE ALUMINUM SHORING

- Light weight
- Easy to assemble
- Strong 2" walls
- All panels are interchangeable
- Minimize ground disturbance
- Reduce restoration cost and public inconvenience
- Eliminate back sloping
- Eliminate injuries from cave-ins
- Support for unstable soils
